Pulling out all the stops.

## ultimail™ 95 Digital Mailing System

### STATE-OF-THE-ART DESIGN AND ENHANCED FEATURES ALLOW ADVANCED CONTROL OVER MAIL PROCESSING.

The German-engineered FP **ultimail™ 95** provides unmatched quality, performance, and versatility with trend-setting features like automatic dating, re-dating, postage correction, automatic label dispenser, and more! With precision and clarity, it processes mail at speeds of up to 120 pieces per minute and enhances the image of your business with crisp 300 dpi print quality. Intelligently designed for efficiency, the **ultimail™ 95** fits neatly into any office environment and works quietly without disturbing co-workers. The combination of a soft-touch panel and an easy-to-understand LCD display virtually eliminates any learning curve for operators. The **ultimail™ 95** enables tracking of up to 150 departmental accounts, creating instant insight into how postage dollars are being spent and immediate bottom-line benefits. Transform the **ultimail™ 95** into an independent mailing station by adding optional scales and specialized accounting and mailing software and save additional time and money!

# ultimail™ 95 Digital Mailing System

## KEY ADVANTAGES

### WORLD-CLASS ENHANCEMENTS

Leveraging a state-of-the-art design, **ultimail™ 95** provides an information-based indicia (IBIP) that delivers the highest level of security proposed by the USPS®. Shape-Based Pricing compliant for automatic mail processing.

### QUICK AND EASY POSTAGE RELOAD WITH FP **teleset™**

**teleset™**, the postage resetting system developed by FP, utilizes direct communication from the meter to our secure processing center. The entire postage reloading process runs automatically.

### CUSTOM MESSAGES AND GRAPHICS

Strengthen brand awareness and add greater personalization with up to 9 user-programmable SMS text-based messages.

### DIFFERENTIAL WEIGHING

Increase productivity when processing your mixed mail with the time-saving reverse weighing option. If you place several pieces of mail on the scale at once and remove one from the integrated scale, the **ultimail™ 95** will automatically calculate the weight of the last piece removed.

### THE **ultimail™ 95** CONVEYOR-STACKER SYSTEM

Just stack your mail in the Automatic Feeder-Sealer and the **ultimail™ 95** will take care of the rest. For added convenience, the optional Conveyor-Stacker handles up to 300 (single-insert) envelopes at one time, eliminating the need to continually empty small exit trays during high-volume runs. The **ultimail™** system shown here allows you to seal, post, and stack mail in one continuous flow for efficient processing.
